

AX-FP15
Food Processor

PROJECT _____
ITEM # _____
QUANTITY _____

The AXIS FP-15 is equipped with a heavy duty electric motor coupled with a high velocity process to obtain optimum results.

- ★ Chops all types of meats, etc.
- ★ Slices all types of vegetables: onions, carrots, garlic, etc.
- ★ Emulsifies all types of mayonnaise, purees, sauces, creams, etc.
- ★ Kneads all types of pastry: pizza, dough, pasta, cakes, etc.
- ★ Confectionery: various types of nuts, etc.

SAFETY FEATURES

A safety function switches the machine off if the bowl and safety cover are not in place.

Manufactured in accordance with safety and hygiene requirements.

The bowl has a capacity of 1.5 US Gallons. The cutting blades are made of high tempered stainless steel, positioned on two planes, higher and lower. This design enables various types of operation, with optimum results.

The clear heavy duty plastic cover allows complete view of the process during operation.

The opening on top of the bowl is adequately protected to stop anything from entering during work.

The food bowl is designed with a round bottom to allow for perfect cleaning

HYGIENE DESIGN

All basic parts are in polished stainless steel and are designed for easy cleaning.

ASSEMBLY

The machine can be assembled without the need for any tools.
